HR ANALYSIS

Tools Used:

- Power BI
- Microsoft Excel (for preprocessing)
-

This project analyzes human resources data using Power BI to uncover insights into key workforce metrics. The goal is to help HR teams and decision-makers:

- Understand employee demographics and trends
- Monitor performance indicators like attrition, absenteeism, and satisfaction
- Identify areas for improvement in hiring, retention, and engagement.

🔍 **Key Features:**

- Interactive dashboards visualizing HR KPIs
- Department-wise and role-wise breakdowns
- Data-driven insights to support strategic workforce planning

This analysis enables better decision-making by transforming raw HR data into meaningful visuals and actionable conclusions.
